

How to Use the USB Microphone (Blue Yeti)

Instructions

1. Plug the mini-A end of the USB cable into the bottom of the USB Microphone and the USB A end into the computer.
2. The USB Microphone will turn on with a solid red light on the mute button.
3. On your computer, go to **Settings -> System -> Sound**, and select, “**Yeti Stereo Microphone**” as your **Input**.
4. To monitor what sounds the USB Microphone is picking up, plug headphones into the headphone jack on the bottom.
5. Adjust the microphone into the upright position with the BLUE logo facing you.
6. Adjust the volume with the **VOLUME DIAL** on the front. (This only works with the headphones plugged directly into the USB Microphone.)
7. Mute the microphone by pressing the **MUTE BUTTON** on the front. The red light will flash while the USB Microphone is muted.
8. Adjust the gain (how much sound the USB Microphone picks up) with the **GAIN DIAL** on the back.
9. Adjust the polar pattern with the **PATTERN DIAL** on the back. There are four options:
 - a. Stereo records left and right.
 - b. Omnidirectional records all around the mic.
 - c. Cardioid records directly in front of the mic.
 - d. Bidirectional records the front and back.
