## CensusPlus from Environics

The 2016 CensusPlus database includes approximately 850 popular variables, based on data collected by Statistics Canada during the 2016 Census. This database is enhanced by Environics to fill in missing values where data are suppressed by Statistics Canada and to correct for random rounding, while maintaining a close relationship to the original census. This package includes the 2016 census, and historical data for the 2011 and 2006 census.

# HouseholdSpend from Environics

HouseholdSpend is commonly used to identify trade area purchase trends, spot cross-promotional opportunities and identify category spending potential. This wide-ranging database provides current estimates of annual expenditures for almost 500 variables, spanning 18 categories of goods and services used by Canadian households. HouseholdSpend enables users to analyze potential expenditures by both average dollars per household and total dollars spent for any geographic level, from all of Canada to a small trade area. It is produced using data from DemoStats, PRIZM and the Survey of Household Spending administered by Statistics Canada. It is also aligned to control totals from the Canadian System of National Accounts and Statistics Canada.

## FoodSpend from Environics

FoodSpend offers valuable insights on what Canadian households are buying from grocery stores and restaurants. This database provides current estimates of annual expenditures for approximately 300 variables of food-related purchases and is produced using data from DemoStats, PRIZM and food expenditures from Statistics Canada's Survey of Household Spending. It is also aligned to control totals from the Canadian System of National Accounts and Statistics Canada. Users can analyze potential expenditures by both average dollars per household and total dollars spent for any geographic level.

## AgeByIncome from Environics

This national database features an age-by-income cross-tabulation of household maintainers detailing six age classes and 10 income classes. The household maintainer age classes are under 35 years old, 35 to 44, 45 to 54, 55 to 64, 65 to 74, and 75 and older. The income classes categorize consumers in increments up to \$200,000+. Derived from custom Statistics Canada tables, AgeByIncome is created using sophisticated statistical processes to accurately model the data at the dissemination area level.

## CommunityHealth from Environics

CommunityHealth provides marketers with approximately 600 variables to better understand and target Canadians based on health-related topics, including their ailments, health care utilization, self-esteem, body mass index and fitness level. The database is derived from the Canadian Community Health Survey (CCHS) administered by Statistics Canada, which collects detailed information on the health status of Canadians. The survey collects the views from approximately 130,000 respondents, aged 12 and older, from households across all provinces and territories.

## PRIZM from Environics

PRIZM segments capture current demographics, lifestyles, consumer behaviours and settlement patterns in Canada. PRIZM is the latest release of our pioneering segmentation system that classifies Canada's neighbourhoods into 68 unique lifestyle types. Continuing with methodology that integrates geographic, demographic and psychographic data, PRIZM incorporates the latest authoritative data from nearly a dozen demographic, marketing and media sources to help you better analyze and understand your customers and markets. PRIZM provides the foundation for building custom segments that are aligned to your goals and objectives.

## DaytimePop from Environics

Planners, marketers and executives use DaytimePop to gain a deeper understanding of the daytime demand, customer traffic and population within their trade areas and target markets. This database is an authoritative and comprehensive estimate of the population that's present in any geographic area during daytime hours. It provides a breakdown of populations at home and at work, as opposed to census data that captures an area's nighttime population. The DaytimePop counts are based on DemoStats and Businesses databases, as well as other reliable sources.

1.  Total Household Population
2.  Total Daytime Population
3.  Change in Daytime Population
4.  Total Daytime Population at Home
5.  Total Daytime Population at Home Aged 0-14
6.  Total Daytime Population at Home Aged 15-64
7.  Total Daytime Population at Home Aged 65 and Over
8.  Total Daytime Population at Work
9.  Total Daytime Population at Work at Usual Place
10.  Total Daytime Population at Work Mobile
11.  Total Daytime Population at Work at Home

## Digital Lifestyle from Environics

This package combines data from Opticks eShopper Powered by AskingCanadians, Opticks Social and the Opticks Mobile Powered by AskingCanadians datasets from Environics. With this database, marketers can profile customers and prospects with greater accuracy according to their mobile behaviour, including minutes spent texting, preferred apps and favourite tablet manufacturers. By evaluating mobile behaviour, brand preferences and usage, advertisers and ad agencies can design more powerful mobile marketing strategies to reach target audiences.
